Botany, also called plant science(s), plant biology or phytology, is the science of plant life and a branch of biology. A botanist, plant scientist or phytologist is a scientist who specialises in this field. The term "botany" comes from the Ancient Greek word βοτάνη (botanē) meaning "pasture", "herbs" "grass", or "fodder"; βοτάνη is in turn derived from βόσκειν (boskein ...

Diplomacy is no longer confined to earthbound matters. Though space diplomacy is not new, the recent proliferation of countries and companies with access to low earth orbit (and beyond) has heightened the need for diplomacy that covers international programs and interactions beyond our atmosphere. Extraterrestrial issues that once encompassed an acute set of national security interests now ...

The heart is a muscular organ in most animals, which pumps blood through the blood vessels of the circulatory system. The pumped blood carries oxygen and nutrients to the body, while carrying metabolic waste such as carbon dioxide to the lungs. In humans, the heart is approximately the size of a closed fist and is located between the lungs, in the middle compartment of the chest.

I ett mänskligt embryo börjar hjärtat att slå cirka tre veckor efter befruktningen eller fem veckor efter den sista normala menstruationsperioden (LMP), vilket är det datum som normalt används för att datera graviditet. Embryots hjärtfrekvens ökar nionde veckan efter LMP. Ökningen är ungefär 3,3 slag/minut per dag. Därefter sjunker den ner till omkring 150 slag per minut under de ...

Serce człowieka (łac. cor, cordis, gr. kardia) – mięśniowy narząd, stanowiący element układu krwionośnego, którego zadaniem jest pompowanie krwi do naczyń krwionośnych. Krew dostarcza ustrojowi tlen i składniki odżywcze, a także współuczestniczy w usuwaniu produktów metabolizmu. U ludzi serce zlokalizowane jest pomiędzy płucami, w środkowej części klatki piersiowej.

O coração é um órgão muscular presente nos humanos e em outros animais que bombeia o sangue através dos vasos sanguíneos do sistema circulatório. [1] O sangue fornece ao corpo oxigénio e nutrientes e ajuda a eliminar resíduos metabólicos. [2] Nos humanos, o coração situa-se na cavidade torácica entre os pulmões, num espaço denominado mediastino. [3]

Martin meeting Clarissa in October 1975.. When Martin came to, he went to track down his tracker and get it back. However, doing this caused him to miss a faculty mixer arranged by his future wife's uncle, who was a professor at Ivy University. Martin found the Waverider and was shocked at the technology of the ship. His older self-reprimanded him for being there as he had unknowingly prevented ...
