## **Cranial Nerve Types and Function | Nervous System Physiology by Aakash Kothari**

There are 12 pairs of cranial nerves, which connect the brain with the eyes, ears, nose, face, tongue, throat, neck, upper shoulders, and some internal organs (see table Testing Cranial Nerves). How many nerves doctors test depends on what type of disorder they suspect. For example, the 1st cranial nerve (the nerve of smell) is not usually tested when a muscle disorder is suspected, but it is ...
