The number e is a mathematical constant approximately equal to 2.71828 and is the base of the natural logarithm, that is the unique number whose natural logarithm equals one. It is the limit of $(1 + 1/n)^n$ as n approaches infinity, an expression that arises in the study of compound interest. It can also be calculated as the sum of the infinite series $= \sum = \infty! = + + \cdot + \cdot \cdot + \dots$
