The Open Library has more than one million free e-books available. This library catalog is an open online project of Internet Archive, and allows users to contribute books. You can easily search by the title, author, and subject.

Soil Nailing Best Practice Guidance

When selecting a waterproofing system, conservatism is the watchword. If leaks appear after the building is completed, the cost of excavation for repairs — even minor repairs — typically far exceeds the initial cost of the waterproofing system. Remember, as a designer you only have one chance to do it right. Research and due diligence are required to ensure that the right system is ...

Slab-on-grade foundations are often placed on 2 to 3 inches of washed gravel or sand and a 6 mil (0.006 inch) polyethylene vapor barrier. This recommended practice prevents moisture in the soil from wicking through the slab. The sand or gravel layer acts primarily as a capillary break to soil moisture transport through the soil.
